2.

[redacted] Talked with Congressman Charles S. Gubser concerning the correspondence he has had with the Department of State on a security situation in Moscow. Mr. Gubser after learning the facts concerning the constituent with whom he was in touch said he wished to be out of the problem as quickly as possible. He did indicate political problems in the actual handling of it and I indicated to him that I would have Robert Lee of the Department of State be in touch with him on the substantive answers to his questions with the hope that between them an appropriate way could be worked out to get Gubser out of the middle. Gubser was sincerely and deeply appreciative of being provided with this information and offered to be of any help in the future that he could.
